Charge = NAV * FMC rate * (No of days from the previous valuation date of the unit price /365)

9.4 Cost of Guarantee Charge

A cost of Guarantee Charge is charged at the rate of 0.10% per annum for the NAV Protector Fund; it will be charged by adjustment of the Unit Price on each Valuation Date. The formula for the deduction of Cost of Guarantee Charge is as under:

Cost of Guarantee Charge = NAV * Cost of Guarantee Charge * (No of days from the previous valuation date of the unit price /365).

9.5 Mortality Charge

This charge is applied on the Sum-At-Risk. This charge is deducted by cancellation of Units at the prevailing Unit Price on Monthly Date. Mortality charges will be deducted on the attained Age basis i.e. charges will be deducted on the current Age on the Monthly Date of processing the charge.

The formula for the deduction of mortality charge is given below:

Mortality Charge = Monthly mortality charge rate for the current Age multiplied by the Sum-At-Risk. Monthly mortality rate is one twelfth of the annual mortality rate.

Sum at risk is higher of Base Plan Sum Assured less Special Fund Value or 105% of the Base Plan Premium plus Top-up Premium less the Special Fund Value.

The applicable service tax and education cess on the mortality charges will also be deducted by cancellation of units. The annual Mortality Charge rate per unit of Sum at Risk for policies accepted at standard rates is as below:
